

HAVEN

OSARA, SALALAH

Menu Pricing Recommendation

A comparative review of Dhofar, Oman and regional cafe pricing,
with recommendations for internal menu consistency.

EXECUTIVE DECISION

The proposed prices remain competitive

Most of the Head Barista's proposed changes place Haven near the middle of the Salalah specialty-cafe market and below premium Muscat and GCC price anchors.

Iced Spanish Latte OMR 1.800 APPROVE	Iced Latte OMR 1.600 APPROVE	Iced Hazelnut Latte OMR 1.700 APPROVE
All Iced Teas OMR 1.500 APPROVE	All Mojitos OMR 1.700 APPROVE WITH PRODUCT PROOF	Brownie OMR 2.500 CONDITIONAL
San Sebastian OMR 1.800 APPROVE	Chocolate Cheesecake OMR 1.800 APPROVE	Iced Dark / White Mocha OMR 1.800 APPROVE

San Sebastian at OMR 1.800 would still be one of the strongest-value offers in its direct Salalah comparison set.

PRINCIPAL RESERVATION

Brownie at OMR 2.500 is premium for Salalah. The serving must visibly justify it through portion, chocolate quality, ice cream, sauce or presentation.

IMPORTANT CAVEAT

July is within Khareef. Current sales are affected by tourism, holiday behaviour and greater customer traffic, so volume alone cannot prove price sensitivity.

MARKET POSITION

Haven remains accessible within specialty coffee

The pale band shows the observed Salalah range. The red marker shows Haven's proposed price. Direct counter evidence is used where available; delivery-only figures are treated as market signals, not assumed in-store prices.

Selected direct comparisons

ESTABLISHMENT	COMPARABLE ITEM	OMR
Hills Cafe, Salalah	Iced Spanish Latte / Iced Latte / San Sebastian	1.600 / 1.400 / 2.000
Rovana, Salalah · counter	Cold Spanish / Latte / Dark Mocha	1.800 / 1.700 / 1.800
Black Drop, Salalah	Cold Spanish / Iced Hazelnut / San Sebastian	1.500 / 1.600 / 2.500
X Cafe, Salalah	Iced Tea / Iced Mocha / San Sebastian	1.700 / 2.000 / 2.100
2 Oz, Salalah · counter	Cold Spanish / Iced Tea / San Sebastian	1.400 / 1.300 / 1.900
Mute, Salalah	Spanish Latte / San Sebastian	1.900 / 2.700
Hurof, Salalah	Cold Spanish / San Sebastian Chocolate	2.500 / 3.000

Counter figures are from dated physical-menu photographs. Remaining comparisons may be delivery prices and can include platform pricing, discounts or accompaniments. Elaborate servings are not exact equivalents to a plain slice.

CHANNEL VALIDATION

Talabat prices are not reliable counter prices

A July 2026 photograph of 2 Oz's physical menu allows a same-cafe, same-period comparison with its Talabat listing. Every matched item is higher on Talabat, but the premium varies by product.

2 OZ ITEM	COUNTER	TALABAT	DIFFERENCE
Cold Spanish Latte	1.400	1.500	+7.1%
Cold Latte	1.200	1.400	+16.7%
Cold Hazelnut Latte	1.500	1.800	+20.0%
Cold Mocha / White Mocha	1.400	1.700	+21.4%
Cold Matcha Latte	1.500	1.900	+26.7%
Iced Tea	1.300	1.400	+7.7%
San Sebastian · plain	1.900	2.200	+15.8%
San Sebastian · chocolate	2.200	2.700	+22.7%
San Sebastian · pistachio	2.400	3.200	+33.3%

Talabat is best read as the delivery market: useful for positioning, but not a substitute for the price a customer sees at the counter.

NO SINGLE CORRECTION FACTOR

2 Oz premiums range from 7% to 33%. Rovana's older counter photograph produces mixed results, including exact matches and some lower Talabat prices. Product, date and channel all matter.

EFFECT ON HAVEN

The drink proposals remain credible. San Sebastian at OMR 1.800 is still below 2 Oz's verified OMR 1.900 counter price. Brownie at OMR 2.500 requires even stronger product proof against 2 Oz's OMR 1.300 counter serving.

WIDER BENCHMARKS

Premium Oman and GCC pricing sits higher

After the proposed changes, Haven remains below most premium Muscat, UAE and Qatar comparisons. Saudi examples support an accessible regional position around OMR 1.700-1.800 for an Iced Spanish Latte.

MARKET AND ESTABLISHMENT	ITEM	LOCAL PRICE	APPROX. OMR
Muscat · Department of Coffee	Iced Spanish Latte	OMR 2.500	2.500
Muscat · Costa	Iced Spanish Latte, small	OMR 2.500	2.500
Muscat · Momaz	San Sebastian Cheesecake	OMR 4.570	4.570
Muscat · Sector Seventeen	Iced Tea / Premium Brownie	OMR 2.500 / 3.500	2.500 / 3.500
Saudi Arabia · LaSani	Iced Spanish Latte	SAR 17	1.740
UAE · Roast Dubai	Iced Spanish Latte	AED 22	2.300
Abu Dhabi · Al Decha	Spanish Latte	AED 22	2.300
Qatar · Anna Cafe	Spanish Latte / Mojito / San Sebastian	QAR 19 / 17 / 30	2.010 / 1.800 / 3.170

1.800 HAVEN PROPOSED ICED SPANISH	2.300 REPRESENTATIVE UAE SPANISH	2.500 PREMIUM MUSCAT SPANISH
---	--	--

Haven does not need to be the cheapest cafe to remain clearly good value.

WHAT COMPARISONS CAN TELL US

- Whether a proposed price feels plausible in the market.
- Where Haven sits between value and premium offers.
- Which products need stronger presentation or proof.

WHAT THEY CANNOT TELL US

- Competitors' true recipes, costs or portions.
- Whether a delivery price matches dine-in.
- Haven's customer price elasticity during Khareef.

San Sebastian is profitable, but not at a high food margin

The OMR 7 difference between cake cost and sales at the current price is gross contribution, not net profit. Labour, service materials, waste, occupancy, payment costs and tax still have to be covered.

Current price · OMR 1.500

15	7	53.3%	18	10	44.4%
REVENUE PER CAKE	GROSS CONTRIBUTION	DIRECT FOOD COST	REVENUE PER CAKE	GROSS CONTRIBUTION	DIRECT FOOD COST

Proposed price · OMR 1.800

At OMR 1.800, Haven improves contribution by OMR 3 per whole cake while remaining at the bottom of the observed Salalah San Sebastian range.

Why the low price may still be valuable

- It encourages an easy add-on to coffee.
- High turnover reduces spoilage.
- It gives Haven a memorable value signature.
- It may generate repeat visits and recommendations.

Why high sales do not prove causation

- San Sebastian is already a fashionable category.
- Texture and coffee pairing are naturally attractive.
- Staff recommendation and visibility matter.
- Khareef increases traffic and holiday spending.

Decision: move to OMR 1.800, then measure slices per 100 transactions, coffee attachment and total contribution. A small fall in units can still be a successful result.

Brownie requires stronger justification

Local brownies with ice cream can appear around OMR 1.600-1.800. OMR 2.500 is defensible only as a generous premium serving. If the product is a simple slice, retain OMR 2.300.

The menu should read as an intentional price ladder

Customers may not calculate costs, but they notice when adjacent products do not appear to follow the same logic.

Proposed iced-coffee ladder

Americano on Ice	1.300
Iced Cappuccino	1.500
Iced Latte	1.600
Iced Caramel Latte	1.700
Iced Hazelnut Latte	1.700
Iced Spanish Latte	1.800
Iced Dark / White Mocha	1.800
Iced Matcha	2.000
Haven Passion Fruit Cold Brew	2.400

Questions before publication

Iced Cappuccino

It remains OMR 1.500 while Iced Latte becomes OMR 1.600. If cup size and ingredient cost are similar, price both at OMR 1.600.

Hot Hazelnut Latte

It remains OMR 1.500 while Caramel is OMR 1.700 and Iced Hazelnut becomes OMR 1.700. Consider OMR 1.700 standard / 1.900 large.

Affogato

At OMR 1.400 it becomes unusually inexpensive beside the revised desserts. Consider OMR 1.600-1.700 if premium vanilla ice cream and full espresso are used.

Naming consistency

Use: Iced Latte	Use: Iced Tea	Use: Iced Mocha
---------------------------	-------------------------	---------------------------

Use “Iced,” not “Ice,” in published English names. Align all flavoured Iced Teas at OMR 1.500; Karkade is already OMR 1.500.

Product proof

At OMR 1.700, Mojitos should genuinely show fruit, mint and citrus rather than reading as soda and syrup. At OMR 2.500, the Brownie description must say what makes the serving premium. Pricing and language should prove one another.

Approve carefully, then measure

Recommended decision

1. Approve all proposed coffee and Iced Tea changes.
2. Approve Mojitos at OMR 1.700 subject to ingredient quality.
3. Approve San Sebastian and Chocolate Cheesecake at OMR 1.800.
4. Approve Brownie at OMR 2.500 only with visible product proof; otherwise retain OMR 2.300.
5. Resolve Iced Cappuccino, hot Hazelnut Latte and Affogato before publishing.

Four-week measurement

- Units sold and revenue
- Direct product cost and waste
- Gross contribution
- Percentage sold with coffee
- Average ticket containing the item
- Customer comments related to price

For San Sebastian, compare slices per 100 transactions, coffees attached per 10 slices, and contribution per 100 transactions. Do not compare raw July volume with a quiet-season week.
